Radoslav Radoev

Web Developer at Sharp HealthCare

San Diego, California, United States

Summary

I have been in the IT industry for over 10 years now. And while I have done it all from customer service rep to systems administrator I always wanted to do more.

I am self thought IT professional and I thought I can teach myself coding. That's why I started taking classes and watching tutorials every minute I can spare, So I ended up getting a Java certificate from UCSD and a bunch of online courses on Udemy. I am lucky enough on my current job to be able to do a lot of scripting, tool making and automation stuff with AutoIT, PowerShell, C#, Python and Node.js (no Java though, although it helps me with my personal Android endeavors and all algorithms and data structures).

Specialties: Software Automation, QA specialist, Systems Administrator, Citrix Administrator, Scripting, Tool Making, Application Packaging

Development: Java, Python, Node.js, C#, PowerShell, AutoIT, REST, GIT, HTML5, Django, Python, JavaScript,

Virtualization/Cloud Technologies: Citrix, XenApp, XenDesktop, VMware, VMware ESX

Experience

Sharp HealthCare

8 years 10 months
